

## INAB List of Proficiency Testing Providers

---

R-PT

It is the policy of the Irish National Accreditation Board (INAB) that all accredited laboratories (and inspection bodies where appropriate) participate in proficiency testing / inter-laboratory comparisons where such schemes are available and relevant to their scope of accreditation.

INAB accepts all proficiency testing / inter-laboratory comparisons recognised by the signatories to the EA and ILAC Multilateral Agreements. Laboratories / inspection bodies may refer to the EPTIS database for availability of proficiency testing schemes. EPTIS is the European Proficiency Testing Information System which is supported by the following organisations: European Co-operation for Accreditation (**EA**); Focus for Analytical Chemistry in Europe (**Eurachem**); European Federation of National Laboratory Associations (**Eurolab**); The Inter American Accreditation Co-operation (**IAAC**); the International Laboratory Accreditation Cooperation (**ILAC**); the European Institute for Reference Materials and Measurements (**IRMM**). This website is sponsored by the European Commission and may be accessed using the following link: <http://www.eptis.bam.de/>

In addition the following list contains details of PT schemes that have been used and found appropriate by INAB accredited organisations and accepted by INAB assessors in fulfilling the requirements of accreditation.

The list has been produced to assist organisations in meeting their responsibilities to identify a suitable scheme for their particular range of tests.

There is no obligation to use these particular schemes and organisations are free to use appropriate alternative schemes which meet the requirements of their accreditation.
